Dear valued Vendor:

DPI strives to be a leader in providing safe, wholesome food products to our customers. We accomplish this by working with both our vendors and customers in establishing and incorporating best business practices in our operations.

With the FDA Food Safety Modernization Act (FSMA) being signed into law on January 4, 2011, the operational procedures and expectations within the food supply chain are changing as the FDA publishes new regulations.

Therefore, as a component of our food safety management system, DPI vendors, on an annual basis, based on Vendor's audit cycle, Vendor shall provide DPI with a copy of its third party food safety audit within thirty (30) days after the audit has been performed. In addition, DPI may request copies of Vendor's policies, certifications and/or procedures, certificates of analysis, including, without limitation, Safety Data Sheets, to validate compliance with Section 14, Product Safety & Recalls, of the DPI Vendor Agreement.

An email address has been established for you to send a copy of your annual food safety audit and other requested documents.

dpi-mdm-fsaudit@dpispecialtyfoods.com

Respectfully,

Robert Crompton
National Director Food Safety
